ORATAPE LT95

TECHNICAL DATA SHEET | Application Tape

Transparent, low-tack application tape intended for transferring cut lettering and graphic designs. The following is a formatted product summary, not an official ORAFOL-issued document.

PROPERTY	SPECIFICATION
Face material	HDPE film
Face film thickness	95 microns
Total thickness including adhesive	145 microns
Weight including adhesive	105 g/m²
Adhesive	Modified polyacrylate; low adhesive strength
Adhesion to stainless steel	1 N / 25 mm after 20 minutes
Tensile strength	Minimum 20 MPa, longitudinal and transverse
Elongation at break	Minimum 450%, longitudinal and transverse
Application temperature	Above +10°C
Shelf life	2 years under specified storage conditions

Important information

Values are provided for product identification and preliminary reference. Confirm current specifications, test methods, storage requirements and regional applicability against the latest manufacturer-issued technical data sheet before purchasing or specifying material.
